

## **Grinding Acres Covid-19 Response**

Due to the COVID-19 outbreak in the United States and in compliance with the government restrictions and requirements regarding business operations, it is necessary for companies to take action. Because Grinding Acres takes the health and well-being of its customers and employees into consideration, we have outlined a response policy to ensure everyone's safety during the outbreak within the Commonwealth of Pennsylvania. We will continue to monitor the situation and make adjustments as needed.

First and foremost, we will remain open at this time and customers will have access to all services. Operating services include mulch/soil pickup and delivery, dumping of wood chips and other forms of wood waste, and installment of erosion and sediment control systems. Secondly, we have made adjustments to our work environment procedures to determine best practices when encountering our staff in accordance with the national CDC guidelines. The documents regarding best practices and procedures have been provided for your convenience.
